Reference
Types: Exercises

By Jeremy Griffith

The following exercises were created to further expose you to Strings as an introduction to Objects.

Equals

Now that you have some basic knowledge of the difference between == and .equals(), try to answer the following without using the interactions pane.

1. "Blue" = "Blue"
2. "Red" == "Red"
3. "Yellow".equals("Yellow")
4. 5 == 7
5. 4 == 5
6. 6.equals(7)
7. 2.0 == 2.0
